CONTENTS

VOL. 23, NO. 1, FEBRUARY 1990

Long-term research and the future of the aquatic environment
The Annual Scientific Meeting of the Freshwater Biological Association
Held at the Royal Society, London, 5 July 1989
Edited by J. M. Elliott, I.F.E. Windermere Laboratory, England

1 *J. M. Elliott:* The need for long-term investigations in ecology and the contribution of the Freshwater Biological Association

7 *E. Tipping:* A model of surface water acidification in Cumbria and its uses in long-term research

25 *C. S. Reynolds:* Temporal scales of variability in pelagic environments and the response of phytoplankton

55 *D. G. George, D. P. Hewitt, J. W. G. Lund and W. J. P. Smyly:* The relative effects of enrichment and climate change on the long-term dynamics of *Daphnia* in Esthwaite Water, Cumbria

71 *D. H. Cushing:* Recent studies on long-term changes in the sea

85 *A. E. Bailey-Watts, A. Kirika, L. May and D. H. Jones:* Changes in phytoplankton over various time scales in a shallow, eutrophic loch: the Loch Leven experience with special reference to the influence of flushing rate

113 *M. Ladle:* Long-term investigations of trophic relationships in southern chalk streams

119 *Chris A. Mills and Margaret A. Hurley:* Long-term studies on the Windermere populations of perch (*Perca fluviatilis*), pike (*Esox lucius*) and Arctic charr (*Salvelinus alpinus*)

137 *J. J. Magnuson and Carl J. Bowser:* A network for long-term ecological research in the United States

145 *J. J. Magnuson, B. J. Benson and T. K. Kratz:* Temporal coherence in the limnology of a suite of lakes in Wisconsin, U.S.A.

161 *J. Gwynfryn Jones:* Long-term research and the future: Résumé

VOL. 23, NO. 2, APRIL 1990

165 *P. J. Wilkin and A. M. Scofield:* The use of a serological technique to examine host selection in a natural population of the medicinal leech, *Hirudo medicinalis*

171 *Timothy Modde and Henry G. Drewes:* Comparison of biotic index values for invertebrate collections from natural and artificial substrates

181 *K. J. Collier and M. J. Winterbourn:* Population dynamics and feeding of mayfly larvae in some acid and alkaline New Zealand streams

191 *Michael Jeffries:* Interspecific differences in movement and hunting success in damselfly larvae (Zygoptera: Insecta): responses to prey availability and predation threat

197 *Vladimir F. Matveev and Esteban G. Balseiro:* Contrasting responses of two cladocerans to changes in the nutritional value of nannoplankton

205 *N. J. Anderson, B. Rippey and A. C. Stevenson:* Change to a diatom assemblage in a eutrophic lake following point source nutrient re-direction: a palaeolimnological approach

219 *Fumio Hayashi:* Convergence of insular dwarfism in damselflies (*Euphaea*) and dobsonflies (*Protohermes*)

233 *M. A. J. Guzkowska and F. Gasse:* Diatoms as indicators of water quality in some English urban lakes.

251 *M. A. J. Guzkowska and F. Gasse:* The seasonal response of diatom communities to variable water quality in some English urban lakes

265 *M. Jeffries:* Evidence of induced plant defences in a pondweed

271 *Heather C. Proctor and Gordon Pritchard:* Prey detection by the water mite *Unionicola crassipes* (Acari: Unionicolidae)

281 *Thomas F. Cuffney, J. Bruce Wallace and G. John Lugthart:* Experimental evidence quantifying the role of benthic invertebrates in organic matter dynamics of headwater streams

301 *Robert L. Sinsabaugh and Arthur E. Linkins:* Enzymic and chemical analysis of particulate organic matter from a boreal river

311 *Hilary A. Neckles, Henry R. Murkin and James A. Cooper:* Influences of seasonal flooding on macroinvertebrate abundance in wetland habitats

323 *R. I. Jones:* Phosphorus transformations in the epilimnion of humic lakes: biological uptake of phosphate

339 *Tamar Zohary and Arcangela M. Pais Madeira:* Structural, physical and chemical characteristics of *Microcystis aeruginosa* hyperscums from a hypertrophic lake

353 *Håkan Olsson:* Phosphatase activity in relation to phytoplankton composition and pH in Swedish lakes

363 *Michael J. Benton and Gordon Pritchard:* Mayfly locomotory responses to endoparasitic infection and predator presence: the effects on predator encounter rate

373 *David M. Barker and Paul D. N. Hebert:* The role of density in sex determination in *Daphnia magna* (Crustacea, Cladocera)

Opinion

379 *Peter Kilham and Susan Soltau Kilham:* Endless summer: internal loading processes dominate nutrient cycling in tropical lakes

391 **Book Reviews; Short Notices**

VOL. 23, NO. 3, JUNE 1990

395 *Steven A. Schoenberg:* Short-term productivity responses of algae and bacteria to zooplankton grazing in two freshwater lakes

411 *Simon D. Rundle and Alan G. Hildrew:* The distribution of micro-arthropods in some southern English streams: the influence of physicochemistry

433 *M. Pöckl and W. Timischl:* Comparative study of mathematical models for the relationship between water temperature and brood development time of *Gammarus fossarum* and *G. roeseli* (Crustacea: Amphipoda)

441 *M. Pöckl and U. H. Humpesch:* Intra- and inter-specific variations in egg survival and brood development time for Austrian populations of *Gammarus fossarum* and *G. roeseli* (Crustacea: Amphipoda)

457 *D. T. Crisp:* Simplified methods of estimating daily mean stream water temperature

463 *M. J. Winterbourn:* Interactions among nutrients, algae and invertebrates in a New Zealand mountain stream

475 *Dean M. DeNicola, C. David McIntire, Gary A. Lamberti, Stanley V. Gregory and Linda R. Ashkenas:* Temporal patterns of grazer–periphyton interactions in laboratory streams

491 *Fiorenza Micheli, Francesca Gherardi and Marco Vannini:* Growth and reproduction in the freshwater crab, *Potamon fluviatile* (Decapoda, Brachyura)

505 *Graham J. C. Underwood and J. D. Thomas:* Grazing interactions between pulmonate snails and epiphytic algae and bacteria

523 *Jouko Sarvala:* Complex and flexible life history of a freshwater benthic harpacticoid species

541 *P. A. Chambers and E. E. Prepas:* Competition and coexistence in submerged aquatic plant communities: the effects of species interactions versus abiotic factors

551 *Peter F. M. Coesel and Klaasjan Wardenaar:* Growth responses of planktonic desmid species in a temperature–light gradient

561 *Karl O. Rothhaupt:* Population growth rates of two closely related rotifer species: effects of food quantity, particle size, and nutritional quality

571 *Leon A. Barmuta, Scott D. Cooper, Stephen K. Hamilton, Kim W. Kratz and John M. Melack:* Responses of zooplankton and zoobenthos to experimental acidification in a high-elevation lake (Sierra Nevada, California, U.S.A.)

587 *Anja J. C. Sinke, Adi A. Cornelese, Peer Keizer, Onno F. R. Van Tongeren and Thomas E. Cappenberg:* Mineralization, pore water chemistry and phosphorus release from peaty sediments in the eutrophic Loosdrecht lakes, The Netherlands

601 *D. T. Crisp:* Water temperature in a stream gravel bed and implications for salmonid incubation

Opinion

613 *D. J. McQueen:* Manipulating lake community structure: where do we go from here?

621 **Book Reviews; Short Notices; Announcement**

623 **Author Index to Volume 23**
